crowdsourcing weather reports

Are you receiving rain or snow... or maybe sleet or even flooding or reduced visibility?

The NOAA National Severe Storms Laboratory is collecting public weather reports through a free app available for smart phones or mobile devices.

GET THE mPING APP!

To use the app, reporters select the type of weather that is occurring, and tap “submit.” The anonymous reports can be submitted as often as every minute.

Check out this [fact sheet](#) for more information.
